CREATIVE FUTURES

ARTS CLASSROOM TO ARTS CAREER
Join us for the inaugural Brisbane Girls Grammar School Creative Futures symposium and discover the path to many potential arts careers for today’s youth.

Tertiary and industry institutions are now providing infrastructure to guide students into constructing their own pathways in the 21st century of work which will be predicated in many cases on the portfolio career rather than any one stop model.

Hear from leading industry experts across a range of artistic and business fields, attend focussed seminars with your peers and network during an informal evening of refreshments.

How will this impact on our pedagogy and guidance we offer students? Step ahead and learn how to conceive creative futures.
